CUSTOM COLOURS

PPG Envirocron Powder Coatings have a selected range of colours and Special Effect products available as stock items. Please refer to the Powder Coating selection available from your local PPG Envirocron Powder Coating Representative.

PPG Envirocron Powder Coatings acknowledge that colour is an individual choice to meet specific design requirements and that colours depicted on the colour chart represent only a few of the popular selling colours.

PPG Envirocron Powder Coatings will design and develop custom powder coatings so customers are not restricted in their choice of colour to only what is shown on any powder colour chart. Certain conditions and restrictions apply to custom colours concerning minimum batch size, price and production lead times on specially developed products.

PPG Industries' offer a free Specification service giving coating systems for individual customer requirements. These specifications can also include a STATEMENT OF LIFE EXPECTANCY (S.O.L.E.) providing customers with an indication on the performance life of the coating system.

Colours indicated are not recommended for areas with high UV exposure

CARE & MAINTENANCE

Like all coatings, a much longer life from powder coated products can be expected if it is given a regular wash. The effect of Ultra Violet light, atmospheric pollution, general dirt and airborne salt deposits all accumulate over time and should be removed at regular intervals. We recommend cleaning takes place every 6 months or more frequently in areas where pollutants are more prevalent such as marine, industrial and geothermal.

1. Dirt and loose deposits should be removed with a wet sponge to prevent scratching.
2. Using a mild detergent in water, clean the powder coating with a soft brush.
3. Always rinse thoroughly with fresh water.

SPECIAL EFFECTS

A wide range of Special Effect Colours include:

Ripple Finishes

Texture Finishes

Hammertone Finishes

Crystal Finishes

PPG PE521/5182AN
Matt Black

PPG PE745/5155
